PROFESSIONAL SUMMARY

Mainframe Modernization Development, Enhancement and Cloud Engineer with 4+ years of experience in COBOL and JCL development, batch job operations, and Micro Focus Enterprise Server support. Skilled in incident management, abend analysis, SQL development, and AWS infrastructure. Strong record of improving batch stability, reducing failures, and maintaining high availability for enterprise-scale systems.

TECHNICAL SKILLS

Mainframe: COBOL, JCL, DB2, Micro Focus Enterprise Server, Batch Processing, Control-M

Languages: Python, SQL, COBOL, JCL, PowerShell

Cloud: AWS (EC2, S3, CloudWatch, RDS, Lambda, IAM, SQS, SNS, Fsx, CloudTrail)

Tools: Git, GitHub, SQL Server Management Studio (SSMS), Jira, Confluence, ServiceNow

PROFESSIONAL EXPERIENCE

TECHNOLOGY ANALYST | Infosys | Mangalore, Karnataka

Dec 2021 – present

Development and enhancement of Modernized mainframe workloads running on Micro Focus Enterprise Server, including COBOL/JCL development, production support, and AWS cloud operations.

Mainframe Development & Enhancement

- Developed and enhanced COBOL programs to fix defects, improve performance, and add new logic for business requirements.
- Created and modified JCL for batch jobs, utilities, dataset definitions, and job scheduling requirements.
- Converted file processing logic into optimized SQL queries in Micro Focus environments, improving runtime by 25–30%.
- Worked on debugging COBOL modules using MF tools, performing variable tracing, file analysis, and logic fixes.

Mainframe Support & Batch Operations

- Supported 10k+ Micro Focus batch jobs, performing monitoring, abend analysis, restarts, and dependency checks.
- Achieved 98% SLA on L2 incident resolution across COBOL, JCL, SQL, and system-integrated processes.
- Reduced recurring failures by identifying issues in JCL steps, dataset handling, COBOL code, and Control-M configuration.

Cloud & Platform Engineering

- Managed AWS EC2 environments, maintaining 99.95% uptime through proactive patching and maintenance.
- Automated secure file transfers using Python and S3, improving delivery speed and reliability by 40%.
- Administered RDS/MS-SQL databases for updates, data correction, and integration with rehosted workloads.
- Implemented alerting and monitoring enhancements using AWS Lambda, CloudWatch, and SNS.

Production Support & Operations

- Provided L2 support using COBOL, JCL, Python, SQL, and batch scripting in a large-scale production environment.
- Executed DR activities, patching, access reviews, and environment health checks compliant with SOC2 standards.
- Created runbooks, SOPs, and support documentation for global teams.
- Collaborated in global incident management, RCA discussions, and post-incident stabilization activities.

EDUCATION

Bachelors of Technology | E & Tc | Vishwakarma Institute of Information Technology, Pune (7.5 CGPA)

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- AWS Certified Solutions Architect - Associate
- Infosys Certified Digital Engineering Cloud Professional
- Infosys Certified Generative AI Professional

ACHIEVEMENTS

- RISE Award at Infosys for being Most Valuable Player.
